

A new and innovative programme providing ideal preparation for progression and employment into the exciting and fascinating world of managing gardens and plant collections.

NQ *Botanic Gardening*

**DUNDEE
COLLEGE**

The University of Dundee Botanic Garden offers a unique "outdoor classroom" environment for students with a special interest in plants.

The superb plant collection, set within a series of magnificent landscape features, will provide students on our new NQ Botanic Gardening with a unique opportunity to learn how plants function; their origins; how they can be used in a landscape; how plant collections are managed and maintained; how key garden features are constructed.

Mainly based in the Botanic Garden, students will also have the opportunity to learn and work at the College Horticulture facilities, to visit other gardens and exhibitions, and to undertake practical projects.

Content:

- Botany
- Plant propagation
- Managing & maintaining plants & collections
- Landscape design
- Garden history
- Soft & Hard Landscaping
- Soil science
- The environment
- Photography & Botanical illustration
- Health & Safety
- Food production
- Royal Horticultural Society (RHS) examination opportunity

Entry requirements:

A good standard of education and a genuine interest in plants and gardens. An interest in the outdoors and the environment.

A reference must be included with all applications. Interviews will be conducted between May and September. Successful students may progress to HNC/D in Horticulture, or into employment.
