

ATA Senior Paint Technician (Course Code CP9341A)

Description

This qualification enables participants to independently prove to insurers and motorists that their vehicle paint service meets with all the required safety criteria of PAS 125 and the Kitemark Scheme.

Course Content: Areas of study include:

- Cosmetic repair on a plastic component
- Plastic and textured paint application
- Application of clear over base (COB) metallic
- Local repair
- Rectification of a paint run

Who can benefit?

Employees who require to provide evidence of current competency levels in structural steel, structural aluminium or composite repair. Participants must have a minimum of five years industry experience, or hold a lower level ATA or a relevant NQF qualification with a minimum of two years post qualification experience in the role.

Benefits

The course provides participants with proof of their current technical competence and professional responsibility through an independently quality assured course. Accredited Senior Technicians will be recognised as highly skilled professionals providing a benchmark within the industry.

Duration and Delivery Mode

This course is delivered over one full day of training.

Examination

Participants will undertake five practical assessments on the areas outlined in the course contents and a multiple choice test based on 45 randomised questions.

Certification: ATA Senior Paint Technician
